

Brailovo písmo je písmo používané zrakově postiženými spoluobčany. Je to vlastně taková tabulka s šesti možnými body, které se různě kombinují, aby daly dohromady písmeno (alespoň podle Brailovy abecedy). Brailova abeceda se od té naší nijak neliší, snad až na dvě výjimky, kterými jsou výjimečné písmeno OU, znak, který signalizuje počátek čísel, a tři možné znaky pro číslovku 10.
